NEW SUB-BRANCHES OF THE NBS

The ceremonial opening of a new building for the sub-branch of the NBS in Poprad on 29th June completed the process of constructing 6 new buildings for sub-branches of the NBS and putting them into operation. Construction started in the first half of last year in Trenčín, Nové Zámky, Žilina, Lučenec, Humenné and Poprad. All the newly constructed sub-branches operate according to the new conception without clearing houses. At present, they already fulfill all the roles associated with securing continual monetary circulation in the regions of Slovakia. The modern buildings with architecturally interesting designs fulfill the strict technical and security criteria for the administration of stocks of money, while also creating fine working conditions for the staff. The six sub-bran-

TRENČÍN

ches have been successively opened over the last three months by the Deputy Governor of the NBS Ivan Šramko with the participation of other representatives of the management of the bank, architects of the buildings and representatives of the towns in which these sub-branches of the NBS operate.
