Source: NBS, Monthly report on the full sector classification of loans (V (NBS) 33-12); data include only loans provided to household sector (S.143, S.144, S.145); only data for banks that grant retail loans are included.

Since the January 1, 2012 two methodological changes have influenced these data (both without any significant impact on the reported data):

a) Data include loans denominated in any currency, not just loans denominated in euro, as it was before December 31, 2011. Due to this change, the volume of total loans granted to households increased by 0.01%.

b) Since January 1, 2012 data are reported at outstanding principal amounts (excluding interests). Until December 31, 2011 the data were reported at a value which included unpaid accrued interests and other facilities in addition to the outstanding principal amount.

The table includes only special-purpose loans secured by real estate (housing loans consisting of mortgage loans, other housing loans and loans provided by building societies), data on any purpose loans secured by real estate is not available.

¹ The total amount of housing loans (column 2) is the sum of mortgage loans (column 3), other housing loans (column 4) and building loans (column 5)

² Shares of banks in mortgage loans in this table are different from the shares reported in the outstanding principal of the mortgage loans received from mortgage controllers (see above). The reason is that this table shows the shares of banks for mortgage loans to households, while the above table includes shares of banks to total mortgage loans. In addition, the difference is caused by the fact that the reports of mortgage controller only comprises those mortgages where the ownership rights to real estates have only been registered by the cadastre authority, while this table shows the total amount of outstanding mortgage principal, regardless of whether this entry by the cadastre authority has already taken place

³ Data include building loans and interim loans
