Source: NBS, Statistical active balance (V(NBS) 33-12); data include only loans provided to household sector (S.143, S.144). The table includes only special-purpose loans secured by real estate (housing loans consisting of mortgage loans, other housing loans and building loans); data on any purpose loans secured by real estate are not available.

¹ The total amount of housing loans is the sum of mortgage loans, other housing loans and building loans.

² The mortgage loan amounts in this table are different from the amounts reported in the outstanding principal of the mortgage loans received from mortgage controllers. The reason is that this table shows the amounts of housing loans for householders, not of the total mortgage loans. In addition, the difference is also caused by the fact that the report of mortgage controller only comprises those mortgage loans where the ownership rights to real estates have already been registered by the cadastre authority, while this table shows the total amount of outstanding mortgage principal, regardless of whether this entry by the cadastre authority has already taken place.

³ Data include building loans and interim loans.
