# Foreword

The *Statistical Bulletin – Monetary and Financial Statistics* is a quarterly publication issued by the Statistics Department of Národná banka Slovenska.

The present issue is based on data as at the end of March 2019. The publication is based on statistical data which are the main source for compilation of the European Central Bank's euro area statistics, of the International Monetary Fund's and Eurostat's statistics, and for monetary and financial stability analyses at the national level.

The last chapter is summarising the methodological notes to the individual areas of statistics under analysis.

Main goal of the Bulletin is to improve the presentation of monthly and quarterly data published on the website of Národná banka Slovenska and to provide users with more comprehensive data on monetary and financial statistics. The Bulletin presents the available aggregated data compiled according to the ECB's methodology and detailed national data presented in the form of tables, charts and commentaries.

The information published in the Bulletin comprises data that are processed and reported by domestic financial institutions, specifically by banks and branches of foreign banks, collective investment undertakings, securities and derivatives dealers, leasing companies, factoring companies, and consumer credit companies.

The Bulletin is available in electronic form on the NBS website ([www.nbs.sk](http://www.nbs.sk)), in PDF format.

We hope that by processing the data in this way, and with the help of feedback from our readers and data users, we will succeed in providing an overview that is quick and easy to use. Any remarks or suggestions regarding the quality of this publication and how it may be improved can be sent to [mbs@nbs.sk](mailto:mbs@nbs.sk).

Editors of the Monetary  
and Financial Statistics Section

# 1 Structure of the financial market in Slovakia

## 1.1 Overview of participants

The total number of monetary financial institutions (sectors S.121, S.122 and S.123) as at the end of the first quarter of 2019 remained unchanged in comparison with the end of the previous quarter. In the 'investment funds' sector (S.124), however, the number of mixed funds increased in the period under review, and in the 'financial intermediaries' sector (S.125), a new sample of companies was selected for reporting statistical data to Národná banka Slovenska, causing a fall in the number of registered reporting entities. Among the remaining sectors, slight increases were recorded at the end of March 2019 in the number of asset management companies in the 'financial auxiliaries' sector (S.126) and in the 'pension funds' sector (S.129).

1) Slovak Insurers' bureau (SIB) has been established by virtue of the Act No. 381/2001 on Compulsory MTPL Insurance and on changes in, and amendments to, some laws.

## 1.2 Employees in the banking sector

The total number of employees in Slovakia's banking sector stood at 20,615 at the end of the first quarter of 2019. This represented a decrease of only 94 employees (0.4%), compared with the figure recorded a year earlier (20,709).

In quarter-on-quarter terms, the number of people employed in the banking sector fell by 34, representing a slight decrease of 0.16%. This indicates that the first three months of 2019 saw no significant organisational or personnel changes in the banking sector. The number of central bank employees remained virtually unchanged at the end of March 2019.

The long-term trend in banking sector employment has also been affected by other events, such as changes in the total number of banks and branches of foreign banks operating in Slovakia, which caused a decline in the number of bank employees during 2017, and organisational changes in some banks at the beginning of 2018, which led to an increase in the number of employees. It should also be noted in this regard that employment at the central bank, Národná banka Slovenska (NBS), had undergone a prolonged increase before the middle of 2017, owing mainly to recruitment at the Financial Consumer Protection Department (following the Slovak Government's approval of a Financial Consumer Protection Plan that, among other things, required the establishment of a single contact point for customers of all financial institutions).

### 1.3 Structure of share capital in the banking sector

The ratio of domestic share capital to total subscribed capital in the banking sector fell slightly, year on year, in the quarter under review, from 5.27% at 31 March 2018 to 5.05% at 31 March 2019.

Of 27 credit institutions operating in Slovakia, domestic share capital was part of the subscribed capital of eight domestic credit institutions, with two banks (ČSOB stavebná sporiteľňa, a.s., and Slovenská záručná a rozvojová banka, a.s.) having a 100% share of domestic capital.

By contrast, the ratio of foreign share capital to total subscribed capital in domestic banks increased, year on year, from 94.73% at 31 March 2018 to 94.95% at 31 March 2019.

During the same period, the total volume of foreign share capital increased in absolute terms by €156.9 million (in relative terms by 4.57%).

This increase was accounted for largely by foreign capital from the Czech Republic and Hungary. Czech-held capital in Slovak banks increased from 52.88% of the total volume of foreign share capital at 31 March 2018 to 54.56% at 31 March 2019 (or by €143 million in absolute terms), and Hungarian-held capital increased in that period from 4.14% to 4.21% (or by €9 million). The increases in Czech and Hungarian holdings in domestic banks reflected capital injections into the local branches of Czech and Hungarian banks.

## 2 Statistics of other monetary financial institutions

### 2.1 Balance sheet statistics of credit institutions: assets

The total assets of banks and foreign bank branches operating in Slovakia, excluding NBS (hereinafter ‘credit institutions’) amounted to €82.8 billion at 31 March 2019. This was due to a year-on-year increase of 5.8% (€4.5 billion), stemming mostly from the growing stock of credit claims.

Credit institutions’ credit claims constituted 81.5% of their total assets at 31 March 2019, which in year-on-year terms represented an increase of 0.9 percentage point and reflected an absolute increase of €4.4 billion (almost 7%). This increase was caused mainly by long-term credit claims with a maturity of over five years, which grew by €4.6 billion. Short-term credit claims with a maturity of over one year and up to five years remained broadly unchanged, while those with a maturity of up to one year decreased by almost €0.2 billion.

Credit institutions’ holdings of securities other than equities and investment fund shares/units accounted for 12.6% of their total assets at 31 March 2019, which in year-on-year terms represented a decline of 1.2 percentage points and reflected an absolute decrease of €0.4 billion (3.6%), caused mainly by a fall of €0.7 billion in the stock of securities with a maturity of over two years.

Credit institutions’ holdings of shares and other equity participations constituted 0.9% of their total assets at 31 March 2019, which was 0.1 percentage point more than in the same period a year earlier. The stock of these shares and other equity participations increased, year on year, by €0.1 billion (21%).

Credit institutions’ other assets (including fixed assets) accounted for 4.1% of their total assets at 31 March 2019, which represented a slight increase of 0.3 percentage point, year on year. The volume of other assets (including fixed assets) grew, year on year, by €0.42 billion (14.5%).

Credit institutions’ cash holdings constituted only about 1% of their total assets at 31 March 2019, which represented a slight decrease, year on year.

## 2.2 Balance sheet statistics of credit institutions: liabilities

The total liabilities of credit institutions operating in Slovakia amounted to €82.8 billion at 31 March 2019, which in year-on-year terms was higher by €4.5 billion (5.8%), owing mainly to an increase in the stock of loans and deposits received.

Credit institutions' largest liability item – loans and deposits received – increased, year on year, in the first quarter of 2019, by 0.6 percentage point as a share of their total liabilities. The stock of these loans and deposits grew, year on year, by €3.4 billion (5.5%), owing mainly to an increase in the stock of loans and deposits received, with a maturity of up to one year. By contrast, the stock of deposits with a maturity of over one year declined, year on year.

Credit institutions' capital and provisions constituted 12.7% of their total liabilities at 31 March 2019, as a year earlier. The volume of capital and provisions at that date was higher by €0.5 billion (4.6%) than a year earlier.

Credit institutions' debt securities accounted for 7% of their total liabilities at 31 March 2019, which in year-on-year terms represented a slight decrease. The stock of these securities amounted to €5.8 billion at that date, representing a year-on-year increase of €0.7 billion (13.4%) that took place mostly in debt securities issued with a maturity of over two years. Since the middle of 2019, a year-on-year decline has been observed in the volume of securities issued.

Credit institutions' other liabilities constituted 2.5% of their total liabilities at 31 March 2019. The stock of other liabilities at that date was higher, year on year, by €0.04 billion (2%).

**Table 5 Structure of liabilities of credit institutions in SR (EUR thousands)**

## 2.3 Selected asset and liabilities items by residency of counterparty

Credit institutions' total credit claims amounted to €67.5 billion at 31 March 2019, of which 88.3% (€59.6 billion) were claims on domestic entities. Credit claims on entities from other euro area countries and from the rest of the world accounted for 2.3% (€1.5 billion) and 9.4% (€6.3 billion) respectively.

Credit institutions' total holdings of securities other than equities and investment fund shares/units amounted to €10.4 billion at 31 March 2019, of which 82% (€8.5 billion) were issued by domestic issuers, 9.8% (€1 billion) by issuers from other euro area countries, and 8.3% (€0.9 billion) by issuers from the rest of the world.

Credit institutions' total holdings of shares and other equity participations amounted to €0.7 billion, of which 49.7% (€0.3 billion) were domestic securities and participations, 14% were equity securities from other euro area countries and 36.3% were equity securities from the rest of the world.

Loans and deposits received by credit institutions amounted to €64.4 billion at 31 March 2019, of which 90.3% (€58 billion) were received from domestic entities, 5.6% (€3.6 billion) from other euro area countries, and 4% (€2.6 billion) from the rest of the world.

#### Chart 7

Selected assets/liabilities: breakdown of counterparties by residency as at 31 March 2019 (%)

Source: NBS.

## 2.4 Selected asset and liability items by sector of counterparty

Credit institutions' total **domestic** credit claims amounted to €59.6 billion at 31 March 2019, of which 95.4% (€56.9 billion) were claims on other sectors, i.e. sectors other than the general government sector and that of monetary financial institutions (MFIs), mainly on households and non-profit institutions serving households, and on non-financial corporations (NFCs).

Claims on domestic MFIs accounted for 2.8% (€1.7 billion) of the total stock of domestic credit claims, while those on the general government sector accounted for 1.8% (€1 billion).

Credit institutions' total holdings of domestic securities other than equities and investment fund shares/units amounted to €8.5 billion at 31 March

2019, of which 87% (€7.4 billion) were debt securities issued by the general government sector.

Securities other than equities and investment fund shares/units issued by domestic MFIs accounted for 9% and those issued by entities from other domestic sectors for 3.8%.

Credit institutions' total holdings of domestic shares and other equity participations (including investment fund shares/units) amounted to roughly €0.3 billion at 31 March 2019, of which 93% were equity securities issued by entities from other sectors and 7% were equity securities issued by domestic MFIs.

The total volume of loans and deposits received from domestic entities amounted to €58.1 billion at the end of the period under review, of which 93.4% were deposits received from other sectors, mostly households, 4.3% were loans and deposits received from the general government sector, and 2.3% were loans and deposits received from domestic MFIs.

#### Chart 8

**Selected assets/liabilities: sectoral breakdown of domestic counterparty as at 31 March 2019 (%)**

**Source:** NBS.

1) Monetary financial institutions – MFIs (S.121 + S.122+S.123).

2) General government (S.13)

3) Other sectors = Investment funds other than money markets funds (S.124) + Other financial corporations (S.125 + S.126 + S.127) + Insurance corporations (S.128) + Pension funds (S.129) + Non-financial corporations (S.11) + Households and Non-profit institutions serving households (S.14 and S.15).

Credit institutions' total claims on residents of **other euro area countries** amounted to €1.5 billion at 31 March 2019, of which 79% (€1.2 billion) were

claims on other sectors and 21% were claims on MFIs from other euro area countries.

Credit institutions' total holdings of securities other than equities and mutual fund shares/units, issued by issuers from other euro area countries, amounted to €1 billion at 31 March 2019, of which 77% (€0.8 billion) were issued by the general government sector, 14% (€0.1 billion) by MFIs, and 9% by issuers from other sectors.

Credit institutions' total holdings of shares and other equity participations, issued by issuers from other euro area countries, amounted to €0.1 billion at 31 March 2019, of which 98% were equity securities issued by entities from other sectors and the remaining 2% were issued by MFIs.

Loans and deposits received by credit institutions from residents of other euro area countries amounted to €3.6 billion, of which 67% (€2.4 billion) were loans and deposits received from MFIs and 33% (€1.1 billion) were deposits received from other sectors.

#### Chart 9

**Selected assets/liabilities: sectoral breakdown of counterparty from other euro area member states as at 31 March 2019 (%)**

Source: NBS.

Credit institutions' total claims on the **rest of the world** amounted to €6.3 billion at 31 March 2019, of which 69% (€4.4 billion) were claims on MFIs and 31% (€1.9 billion) were claims on other sectors.

Credit institutions' holdings of securities other than equities and investment fund shares/units, issued by issuers from the rest of the world,

amounted to €0.9 billion at 31 March 2019, of which 58% (€0.5 billion) were issued by the general government sector, 30% by MFIs, and 12% by issuers from other sectors.

Credit institutions' holdings of shares and other equity participations issued by issuers from the rest of the world amounted to €0.3 billion at 31 March 2019, all of which were issued by issuers from other sectors (i.e. sectors other than the MFI and general government sectors).

The volume of loans and deposits received from residents of the rest of the world amounted to €2.6 billion at 31 March 2019, of which 61% (€1.6 billion) were received from other sectors and 38% (€1 billion) from MFIs. The share of loans and deposits received from the general government sector was negligible.

## 2.5 Assets and liabilities of credit institutions: year-on-year changes

The total **assets of credit institutions** showed a year-on-year increase at the end of each quarter in the period since the first quarter of 2018, the largest being a year-on-year increase of 5.8% (€4.5 billion) recorded at the end of the first quarter of 2019.

Credit institutions' total credit claims recorded their biggest year-on-year change in the first quarter of 2018. This was an increase of €4.5 billion

(7.7%), of which claims with a maturity of over five years accounted for €4.3 billion and claims with a maturity of over one year and up to five years for €0.2 billion.

Credit institutions' total holdings of securities other than equities and investment fund shares/units recorded their most noticeable year-on-year change at the end of the first quarter of 2018, i.e. a decrease of 9% (€1 billion) year on year.

Credit institutions' total holdings of shares and other equity participations (including investment fund shares/units) were relatively low at the end of each quarter under review. Their highest amount (€0.7 billion) and biggest year-on-year change (i.e. an increase of 21% or €0.1 billion year on year) were recorded at the end of March 2019.

Credit institutions' other assets (including fixed assets) recorded their biggest annual change at 31 March 2019, i.e. a year-on-year increase of 14.5% (€0.5 billion) in their stock.

Credit institutions' total cash holdings recorded their most significant annual change in percentage terms at 31 March 2018, i.e. a year-on-year increase of 11.3%. In absolute terms, the biggest annual change was also recorded in the first quarter of 2018, i.e. a year-on-year increase of €0.08 billion.

Source: NBS.

The total **liabilities of credit institutions** have increased, year on year, in the last few quarters. The most significant increase was recorded in the first quarter of 2019, when the stock of these liabilities increased by €4.5 billion (5.8%) year-on-year.

This trend was driven largely by a year-on-year increase of 7.22% (€4.3 billion) recorded, at end-December 2018, in the volume of loans and deposits received by credit institutions. The total stock of loans and deposits received with a maturity of up to one year increased by €4.6 billion, while that of loans and deposits received with a maturity of over one year decreased by €0.3 billion.

The stock of debt securities issued in the period under review recorded its biggest annual change in the first quarter of 2019. This was a year-on-year increase of 13.4% (€0.7 billion) that stemmed mainly from an increase in the stock of securities with a maturity of over two years.

Credit institutions' capital and provisions in total recorded their most noticeable annual change at the end of the third quarter of 2018, i.e. a year-on-year increase of 4.9% (€0.5 billion).

Credit institutions' other liabilities recorded their most significant annual change at the end of the last quarter of 2018, i.e. a year-on-year decrease of 13.6%.

## 2.6 Profit/loss analysis for credit institutions

### 2.6.1 Current period profit/ loss in the first quarter of 2019

With effect from the beginning of 2018, banks have adjusted their book-keeping systems to the new accounting standards (IFRS 9). The IFRS 9 standards have introduced new criteria for the classification of financial assets, an improved accounting method for depreciated financial assets, and new requirements for hedge accounting.

According to the data available, the banking sector's cumulative profit in the first quarter of 2019 amounted to €164 million, representing the sec-

tor's fifth highest profit recorded since the beginning of monitoring (2009). The profit earned in the first quarter of 2019 was 3.2% lower than in the same period a year earlier.

As regards the structure of income and expense items, net interest income had a positive effect on net profit growth throughout 2018 (for the first time since March 2015). In the first quarter of 2019, however, net interest income declined again, year on year, and thus had a negative impact on net profit growth.

The decline in net interest income was caused mainly by a fall in interest income from securities, coupled with a drop in other interest income. After growing in the period from March 2018 till the end of the year, other interest income fell again, year on year.

Net non-interest income continued to decline, year on year, in the first quarter of 2019, following its downward trend from the second half of 2017. A positive contribution to growth in net non-interest income was made in that period by income from fees and commissions, while dividends received fell year on year.

The decline in net non-interest income was largely attributable to other operating losses that stemmed mainly from the payment of a special levy by selected institutions and from contributions to the resolution fund.

General operating expenses rose during 2018 and continued rising slightly in the first quarter of 2019, too. This situation had a negative impact on the growth of the banking sector's net profit (a contribution of -7.3 percentage points for 2018 and 0.78 percentage point for the first quarter of 2019). The net creation of reserves and provisions (i.e. income adjusted for expenses) resulted in a loss of €13 million, representing a year-on-year decrease of €15 million.

**Chart 13**

**Current period profit/loss (EUR thousands)**

Source: NBS.

**Chart 14**

**Current period profit/loss (EUR thousands)**

Source: NBS.

Total loan-loss provisions at 31 March 2019 were 8% lower than a year earlier, whereas the stock of provisioned customer loans had increased, year on year, by 8.2%. Euro-denominated claims constituted at that date more than 98% of all credit claims, and euro-denominated claims on euro area residents made up around 95%.

Provisioning expenses at 31 March 2019 (cumulative figure for the first three months) were lower by 30% year on year, and income from the reversal of provisions had fallen by that date by 16%.

Expenses related to the assignment of claims on non-bank customers exceeded income from the same by €438,000 in the first quarter of 2019, and claim write-offs produced a net loss of €19 million.

## 2.6.2 Selected income/expense items as reflected in profits/losses

In this section, selected income and expense items related to the main activities of credit institutions are compared with the profit or loss made.

In the first quarter of 2019, according to aggregated data, total interest income from securities continued to decline, year on year, by 3.6%, following its downward trend from the previous three years. In 2016, interest income from securities dropped, year on year, by 10.1%, in 2017 by 20.2%, and in 2018 by 10%.

Interest expenses on securities decreased, year on year, by 4.6% in the quarter under review. They had previously dropped in both 2017 and 2018, by almost 15% and 16% respectively.

Other interest income fell very slightly in the first quarter of this year, by 0.3% year on year. In 2018, an increase was recorded in this item, preceded by a steady decline observed since 2015.

Income from fees and commissions continued to grow in the first quarter of 2019, by 5.7% year on year.

General operating expenses increased in the quarter under review by 0.4% year on year.

The banking sector's total net profit for the first quarter of 2019 was 3.2% lower than the figure for the same period of 2018 and amounted to €164 million.

## 2.7 Lending to non-financial corporations and households

### 2.7.1 Loans to non-financial corporations by maturity

The first quarter of 2019 saw considerable year-on-year changes in the total stock of loans provided to non-financial corporations (NFCs). The stock of short-term loans grew at an annual rate of 5.3%, representing an acceleration in comparison with the previous year. The stock of long-term loans with a maturity of over one year and up to five years declined by 0.7% year on year, for the first time since December 2015. The annual growth rate of long-term loans with a maturity of over five years accelerated in the quarter under review, to 7.1%.

**Chart 21**

Loans to non-financial corporations by maturity (year-on-year changes in %)

Source: NBS.

**Chart 22**

Loans to non-financial corporations by maturity (% share)

Source: NBS.

## 2.7.2 Loans to households by maturity

The rate of growth in the total stock of loans provided to households slowed during the first quarter of this year, to 9.5%. The strongest growth was observed in loans with a maturity of over five years, at a pace of 10.4%. The stock of long-term loans with a maturity of over one year and up to five years decreased, for the first time since September 2016, by 2.1% year on year. The stock of short-term loans provided to households declined by 3.6%, compared with the same period a year earlier.

**Chart 23**

Loans to households by maturity (year-on-year percentage changes)

Source: NBS.

**Chart 24**

Household loans broken down by maturity (% share)

Source: NBS.

### 2.7.3 Loans to non-financial corporations by type of loan

The total stock of loans provided to NFCs continued to grow in the first quarter of 2019, at a somewhat slower pace (4.8%). In the category of operating loans, an annual growth rate of 23.3% was recorded at the end of March. The stock of investment loans declined by 0.8% year on year. In the category of current account overdrafts and revolving loans, the rate of growth had accelerated to 1.5% by 31 March 2019. The stock of real estate loans for NFCs increased, year on year, by 14.9% in the quarter under review, compared with 5.7% in the same period a year earlier.

**Chart 25**

**Loans to non-financial by type of loan (year-on-year percentage changes)**

Source: NBS.

## 2.7.4 Loans to households by type of loan

The annual rate of growth in lending to households continued to slow in the first quarter of 2019, to around 9.5%. The stock of credit card loans had declined by 4.8% by 31 March 2019, continuing its downward trend that began in July 2017. The annual rate of growth in current account overdrafts and revolving loans declined in the period under review, to -3.4%. The stock of house purchase loans and consumer loans increased, year on year, by 10.9% and 3.5% respectively.

**Chart 26**

**Households loans broken down by type of loan (year-on-year percentage changes)**

## 2.7.5 Loans to non-financial corporations by economic sector

A breakdown by sector of economic activity of loans provided to non-financial corporations (NFCs) shows that, at 31 March 2019, loans to the real estate sector accounted for the largest share (19.8%) of the total stock of NFC loans. The share of loans provided to the manufacturing sector increased slightly, to 19.4%, while the share of loans to the sector comprising wholesale trade, retail trade, and the repair of motor vehicles and motorcycles remained unchanged, at 16.3% in total loans granted.

### 2.7.6 Non-performing loans to non-financial corporations

The ratio of non-performing loans (NPLs) to loans provided to non-financial corporations (NFCs) in total decreased, year on year, to 3.6% at 31 March 2019, maintaining the downward trend from the previous months. The NPL ratio for current account overdrafts fell slightly, from 3.7% at 31 March 2018 to 3.2% at 31 March 2019. The NPL ratio for operating loans reached 3.2%, indicating a moderately rising trend in NPLs in this category. In the category of investment loans, the NPL ratio dropped to 2.8% at 31 March 2019. The NPL ratio for real estate loans provided to NFCs fell, year on year, to 4.7%, and that for credit card loans, to 10.0%.

## 2.7.7 Non-performing loans to households

The ratio of NPLs to the total stock of loans provided to households fell slightly, year on year, to 2.9% at the end of the first quarter of 2019. The highest NPL ratio in that period was recorded in the category of credit card loans (13.6%). The NPL ratio for current account overdrafts declined continuously, year on year, to 5.7% at 31 March 2019. The NPL ratio for housing loans decreased slightly, both quarter on quarter and year on year, to 1.5% at 31 March 2019. The NPL ratio for consumer loans dropped by 0.6 percentage point, year on year, to 8.7% at 31 March 2019.

## 2.8 Loans – interest rates, volumes and stocks

### 2.8.1 New loans to NFCs – interest rates and volumes

The total volume of new loans provided to non-financial corporations (NFCs) in the first quarter of 2019 decreased by 13.0%, compared with the same quarter of 2018. In the category of **loans of up to €1 million**, the volume of loans increased in the period under review, by 13.1% year on year. Their share of the total volume of NFC loans provided in that period amounted to 19.5%. The average interest rate on these loans in the period under review was 3.3% per annum, which in year-on-year terms was lower by 0.1 percentage point. In the category of **loans of over €1 million**, the volume of loans provided in the first quarter of this year decreased by 17.6% year on year. Their share of the total volume of NFC loans provided in that period was 80.5%, and the average interest rate on these loans stood at 1.5% p.a., representing a fall of 0.3 percentage point year on year.

Chart 40

## 2.8.2 New loans to households – interest rates and volumes

### 2.8.2.1 Housing loans – interest rates and volumes

Households' demand for **housing loans** remained strong in the first quarter of 2019, far stronger than their demand for any other type of loan. The average interest rate on housing loans fell in that period by 0.2 percentage point year on year, to 1.5% p.a. The annual rates of change in average interest rates on the individual types of housing loans were in the period under review as follows: the rate on **building loans** provided by home savings banks rose slightly, by 0.1 percentage point, to 3.7% p.a.; the rate on **intermediate loans**, which are also provided by home savings banks, increased, too, by 0.3 percentage point, to 3.7% p.a.; while the rate on **other loans for house purchase** rose by as much as 2.3 percentage points, to 3.8% p.a. Interest rates fell on average in the period under review only for **mortgage loans**, specifically by 0.2 percentage point, to 1.4% p.a.

Chart 49

New loans for house purchase to households – interest rates and volumes  
(EUR millions, % p.a.)

Source: NBS.

### 2.8.2.2 Housing loans and consumer loans – interest rates and the APRC

The **annual percentage rate of charge (APRC)** on loans provided to households usually exceeds the rate of interest charged on these loans. Like the average interest rate on housing loans, the APRC on these loans decreased in the first quarter of 2019, by 0.1 percentage point year on year, to 1.8% p.a. The APRC on consumer loans showed a similar trend in that period, with the average interest rate declining, year on year, by 0.7 percentage point, to

8.1% p.a., and the average APRC on consumer loans decreasing by 0.8 percentage point, to 8.7% p.a.

**Chart 50**

**New loans for consumption and loans for house purchase – interest rates, APRC and volumes (EUR millions, % p.a.)**

Source: NBS.

### 2.8.2.3 Secured housing loans – interest rates and volumes

The share of **new secured housing loans** in the total volume of new housing loans provided to households increased, year on year, by 1.6% in the first quarter of 2019, to 94.6%. The average interest rate on these loans fell in the period under review by 0.2 percentage point, to 1.4% p.a.

Chart 51

Source: NBS.

Chart 52

Share of new secured loans for house purchase in total new loans for house purchase to households (EUR millions)

Source: NBS.

#### 2.8.2.4 Secured consumer loans – interest rates and volumes

The share of **secured consumer loans** in the total volume of consumer loans was substantially lower than the share of secured housing loans in the total volume of housing loans. The share of these loans increased slightly in the first quarter of 2019, to 4.0%, from 3.2% in the same quarter a year earlier. The average interest rate on secured consumer loans fell in the period under review, by 0.3 percentage point year on year, to 6.2% p.a.

**Chart 53**

**Secured and total new loans for consumption to households – interest rates and volumes (EUR millions, % p.a.)**

Source: NBS.

**Chart 54**

**Share of secured loans for consumption in total new loans for consumption to households (EUR millions)**

Source: NBS.

### 2.8.3 Loans to NFCs – interest rates and stocks

Interest rates on loans provided to non-financial corporations (NFCs) with a maturity of over one year and up to five years have long been higher than the rates on loans with other maturities, but these loans account for the smallest share of the stock of NFC loans. Loans with a maturity of over five years accounted for the largest share of the stock of NFC loans in the first quarter of 2019, continuing a trend going back to the second half of 2009.

Average interest rates on **NFC loans** underwent the following changes in the first quarter of 2019: the average rate for loans with a maturity of up to one year rose slightly, by 0.07 percentage point, to 2.32% p.a.; the average rate for loans with a maturity of over one year and up to five years rose slightly, by 0.05 percentage point, to 2.61% p.a.; while the average rate for loans with a maturity of over five years fell slightly, by 0.03 percentage point, to 2.34% p.a.

**Chart 55**

**NFC loans by maturity – interest rates and volumes (EUR millions, % p.a.)**

Source: NBS.

## 2.8.4 Loans to households – interest rates and stocks

### 2.8.4.1 Housing loans – interest rates and stocks

In terms of the stock of loans, a clear majority of loans provided to households (both housing loans and consumer loans) have a maturity of over five years.

Interest rates on **house purchase loans** provided to households changed in the period under review as follows: the average rate for loans with a maturity of over five years fell by 0.3 percentage point, to 1.9% p.a.; that for loans with a maturity of over one year and up to five years fell, too, by 0.4 percentage point, to 3.1% p.a.; while the average rate for loans with a maturity of up to one year rose by 0.4 percentage point, to 4.6% p.a.

Chart 56

Households loans for house purchase by maturity – interest rates and volumes  
(EUR millions, % p.a.)

Source: NBS.

#### 2.8.4.2 Consumer loans – interest rates and stocks

The stock of consumer loans with a maturity of up to one year remained negligible in the first quarter of this year, resulting in marked volatility in the average interest rate on these loans. The stock of consumer loans with a maturity of over one year and up to five years fell slightly in the period under review. Loans with a maturity of over five years still accounted for the largest share of the stock of consumer loans.

Average interest rates on **consumer loans** provided to households changed in the period under review as follows: the average rate for consumer loans with a maturity of over one year and up to five years dropped, year on year, by 1.2 percentage points, to 9.9% p.a.; the average rate for consumer loans with a maturity of over five years fell, too, by 0.8 percentage point, to 8.7% p.a.; and the average rate for consumer loans with a maturity of up to one year rose by 1.2 percentage points, to 18.6% p.a.

Chart 57

Households loans for consumption by maturity – interest rates and volumes  
(EUR millions, % p.a.)

Source: NBS.

## 2.9 Deposits received from non-financial corporations and households

### 2.9.1 Deposits received from non-financial corporations

The stock of deposits received from NFCs was 0.5% higher at the end of March 2019 than a year earlier. This increase was accounted for largely by sight deposits, which grew during the first quarter of this year by 7.1% year on year. Deposits with an agreed maturity declined in that period, by 39.6% year on year. Other deposits also recorded a fall of 5.9% at 31 March 2019, compared with the figure recorded a year earlier.

## 2.10 Deposits received – interest rates, volumes and stocks

### 2.10.1 Household deposits – interest rates and stocks

In the first quarter of 2019, household deposits **with an agreed maturity of up to two years** accounted for 55.7% of the total stock of household de-

posits with an agreed maturity, which in year-on-year terms represented a decrease of 0.6%. The average interest rate on these deposits rose slightly in the first quarter of this year, by 0.02 percentage point, to 0.48% p.a. The average rate on deposits **with an agreed maturity of over two years** fell in the period under review, by 0.21 percentage point year on year, to 1.25% p.a. The total stock of household deposits with an agreed maturity declined during that period by 2.2% year on year.

**Chart 62**

**Household deposits with an agreed maturity – interest rates and stocks**  
(EUR millions, % p.a.)

Source: NBS.

## 2.10.2 New household deposits – interest rates and volumes

Interest rates on **new household deposits** with an agreed maturity changed in the period under review as described below. The average interest rate on new household **deposits with an agreed maturity of up to one year** rose by 0.5 percentage point, to 1.1% p.a., and the share of these deposits in the total volume of new household deposits with an agreed maturity decreased by 11.7%, to 47.4%. The average rate on new **deposits with an agreed maturity of over one year and up to two years** rose by 0.1 percentage point year on year, to 1.0% p.a., and the share of these deposits in the total volume of new household deposits with agreed maturity increased by 23.5%, to 39.8%. The average rate on **deposits with an agreed maturity of over two years** fell in the period under review, by 0.3 percentage point year on year, to 1.2% p.a., while the share of these deposits in the total volume of new household deposits with agreed maturity decreased by 11.7%, to 12.8%.

Chart 63

(EUR millions, % p.a.)

Source: NBS.

### 2.10.3 NFC deposits – interest rates and stocks

In the first quarter of 2019, **NFC deposits with an agreed maturity of over two years** accounted for 4.7% of the total stock of NFC deposits with agreed maturity, which in year-on-year terms represented an increase of 1.6%. The average interest rate on such deposits was 0.28 percentage point lower at that date than a year earlier, at 0.53% p.a. As for **NFC deposits with an agreed maturity of up to two years**, their share of the total stock of NFC deposits with agreed maturity was 95.3%, down by 1.6%, while the average interest rate on these deposits was lower in the period under review by 0.02 percentage point, at 0.15% p.a. The total stock of NFC deposits with agreed maturity declined over the period under review, by 25.7% year on year.

Chart 64

NFC deposits with an agreed maturity – interest rates and stocks  
(EUR millions, % p.a.)

Source: NBS.

#### 2.10.4 New NFC deposits – interest rates and volumes

Interest rates on **new deposits** with agreed maturity, received from non-financial corporations (NFCs), changed in the first quarter of 2019, year on year, as described below. The average interest rate on new deposits **with an agreed maturity of over two years** was 0.27 percentage point higher, year on year, at 0.47% p.a., while the share of these deposits in the total volume of NFC deposits with agreed maturity was relatively insignificant (1.2%). The average rate on new NFC deposits **with an agreed maturity of over one year and up to two years** edged down by 0.03 percentage point, to 0.18% p.a., while the share of these deposits in the total volume of NFC deposits with agreed maturity increased slightly, by 0.1%, to 1.1%. The average rate on new deposits **with an agreed maturity of up to one year** fell slightly, by 0.01 percentage point, to 0.12% p.a., but their share of the total volume of new NFC deposits with agreed maturity was by far the largest (97.7%).

## 3 Investment funds and Money market funds

In Slovakia's financial market, the mutual fund market comprises five domestic asset management companies and one foreign asset management company, managing a total of 91 domestic open-end funds as at 31 March 2019.

Domestic asset management companies:

- Asset Management Slovenskej sporiteľne, správ. spol., a.s.
- IAD Investments, správ. spol., a.s.
- Prvá Penzijná správcovská spoločnosť Poštovej banky, správ. spol., a.s.
- Tatra Asset Management, správ. spol., a.s.
- VÚB Asset Management, správ. spol., a.s.

Foreign asset management company:

- ČSOB Asset Management, a.s., investiční společnost

### 3.1 Current developments in the market

For the purposes of monetary and financial statistics compiled by the European Central Bank, mutual funds are broken-down to investment funds (ESA 2010 sector S.124) and money market funds (sector S.123). The investment funds are further more divided according to their investment strategy into the following categories: bond funds, equity funds, mixed funds, real estate funds, hedge funds and other funds.

Mixed funds accounted for the largest share, 47.44%, of the total assets of investment funds as at 31 March 2019. They were followed by bond funds with a share of 23.40% (down by 1.74 percentage points quarter on quarter), real estate funds with a share of 19.97%, and equity funds with a share of 7.92% at the end of March. As for other funds, including, for example, guaranteed funds, alternative investment funds, securities funds and professional investor funds, their share of total assets decreased in the quarter under review, to 1.27% at 31 March 2019. Thus, other funds are the fifth most significant group of funds in terms of their share of the total assets of investment funds.

At the end of March 2019, the total asset value of mixed funds was higher both year on year, by 12.35%, and quarter on quarter, by 8.41%. The total asset value of real estate funds was higher year on year, by 15.28%, and quarter on quarter by 2.31% at 31 March 2019. The total asset value of equity funds was also higher at that date, by 19.17% year on year and 15.76%

quarter on quarter. Bond funds recorded a quarter-on-quarter fall of 2.38% in their asset value, which declined year on year by 8.94%. Other funds recorded a year-on-year drop of 55.47% at 31 March 2019.

**Table 8 Total assets of investment funds broken down by type of fund**

Total assets	Year-on-year percentage changes								
	III. 2017	VI. 2017	IX. 2017	XII. 2017	III. 2018	VI. 2018	IX. 2018	XII. 2018	III. 2019
Bond funds	13,94	16,66	-1,38	-0,45	1,70	-2,37	-1,79	-8,84	-8,94
Equity funds	3,29	11,07	7,28	8,80	17,49	21,80	22,69	4,49	19,17

## 3.2 Asset structure of domestic investment funds

### 3.2.1 Bond funds

Bond funds invest primarily in government and bank debt securities and in bank time deposits.

In terms of asset type, bond funds' total assets as at 31 March 2019 broke down as follows: 39.78% were debt securities (down from 41.55% at the end of the previous quarter); 34.56% were bank time deposits and current account holdings; 23.96% were mutual fund shares/units; and the remaining 1.70% were other assets (including financial derivatives).

In terms of issuer residency, bond funds' holdings of debt securities as at 31 March 2019 broke down as follows: 52.32% were securities issued in the rest of the world (up by 0.07 percentage point); 25.45% were domestic securities (down by 0.54 percentage point); and 22.23% were securities issued in other euro area countries (up by 0.47 percentage point).

In terms of issuer sector, bond funds' holdings of debt securities as at 31 March 2019 broke down as follows: 43.00% were government bonds; 28.17% were debt securities issued by banks; and the remaining 28.82% were debt securities issued by non-financial corporations and other financial institutions.

In terms of residual maturity, bond funds' holdings of debt securities as at 31 March 2019 broke down as follows: 22.39% had a maturity of up to one year, 14.98% a maturity of over one year and up to two years, and 62.63% a maturity of over two years.

### 3.2.2 Equity funds

In terms of asset type, equity funds' total assets as at 31 March 2019 broke down as follows: 51.02% were shares and other equity participations; 38.41% were mutual fund shares/units (up by 0.70 percentage point); 9.39% were bank deposit account holdings (down by 1.39 percentage points); 0.97% were debt securities; and 0.22% were other assets (including financial derivatives).

In terms of issuer residency, equity funds' holdings of investment fund shares/units as at 31 March 2019 broke down as follows: 17.67% were issued by funds resident in Slovakia; 74.86% were issued by funds resident in other euro area countries; and 7.48% were issued by funds resident in the rest of the world. In terms of sector, equity funds' holdings of shares/units as at the end of the period under review comprised exclusively investment fund shares/units.

In terms of issuer residency and sector, equity funds' holdings of shares as at 31 March 2019 broke down as follows: 67.90% were issued by NFCs resident in the rest of the world; 13.36% were issued by NFCs resident in euro area countries; 7.56% were issued by credit institutions resident in non-euro area EU countries; and less than 6% were issued by issuers from other sectors.

### 3.2.3 Mixed funds

In terms of asset type, mixed funds' total assets as at 31 March 2019 broke down as follows: 63.85% were mutual fund shares/units (up by 1.95 percentage points from the end of the previous quarter); 22.58% were bank deposit account holdings; 11.60% were debt securities; 1.27% were shares; and 0.71% were other assets (including financial derivatives).

In terms of issuer residency, mixed funds' holdings of investment fund shares/units remained broadly unchanged in the quarter under review and, at 31 March 2019, broke down as follows: 72.68% were issued by funds resident in euro area countries; 20.84% were issued by domestic funds; and 6.48% were issued by funds resident in the rest of the world.

In terms of issuer residency, mixed funds' holdings of securities as at 31 March 2019 broke down as follows: 69.13% were bonds issued by domestic issuers, 23.32% were securities issued by issuers from other euro area countries, and 7.55% were securities issued by corporations from the rest of the world.

In terms of issuer sector, non-financial corporations (sector S.11) accounted for the largest share, 32.70%, of mixed funds' securities holdings as at 31 March 2019, followed by the general government sector (S.13) with a share of 11.17% and the banking sector (S.122) with a share of 7.39%.

In terms of residual maturity, mixed funds' holdings of securities as at 31 March 2019 broke down as follows: 8.03% had a maturity of up to one year, 16.49% a maturity of over one year and up to two years, and 75.47% a maturity of over two years.

### 3.2.4 Real estate funds

Real estate funds invest primarily in shares and equity participations in real estate companies, according to their investment strategy. They may use the funds obtained to provide loans to real estate companies in accordance with the applicable law.

In terms of asset type, real estate funds' total assets as at 31 March 2019 broke down as follows: 35.61% were bank deposits and loans provided to real estate companies (up from their share at end-2018); 58.04% were shares and other equity participations (down by 0.41 percentage point); 3.76% were debt securities; 1.50% were mutual fund shares/units; and 1.08% were other assets.

In terms of residency and sector, the companies in which real estate funds held shares and other equity participations at 31 March 2018 broke down as follows: 86.37% were domestic NFCs (sector S.11); 4.90% were NFCs from other EU Member States (less than at the end of the previous quarter); and 8.13% were NFCs from the rest of the world (less than at the end of 2018).

Note: SK = domestic issuers; EMU = issuers from other euro area member states; RoW = issuers from the rest of the world.

### 3.2.5 Other funds

Other investment funds comprise investment funds whose investment strategy does not allow them to be clearly placed in any of the above-mentioned categories. They include guaranteed funds, alternative investment funds (e.g. commodity funds), securities funds, professional investor funds, and other specialised funds.

The assets of other funds managed by domestic asset management companies comprise mainly bank deposits, debt securities, and investment fund shares/units.

In terms of asset type, other funds' total assets as at 31 March 2019 broke down as follows: 50.99% were mutual fund shares/units; 37.40% were debt securities (up by 2.14 percentage points quarter on quarter); and 10.42% were bank deposit holdings.

In terms of issuer residency, other funds' holdings of debt securities as at 31 March 2019 remained broadly unchanged, quarter on quarter, as follows: 47.58% were domestic securities (up by 0.72 percentage point); 26.62% were securities issued in the rest of the world (down by 0.55 percentage point quarter on quarter); 25.79% were securities issued in other euro area countries (down by 0.18 percentage point quarter on quarter).

In terms of issuer sector, securities issued by NFCs (sector S.11) accounted for the largest share of other funds' holdings of debt securities at 31 March 2019, 27.53%, followed by securities issued by the general government sector (S.13) with a share of 11.16%, and securities issued by banks (S.122) with a share of 9.94%.

In terms of residual maturity, other funds' holdings of securities as at 31 March 2019 broke down as follows: 8.70% had a maturity of up to one year, 10.85% a maturity of over one year and up to two years, and 80.45% a maturity of over two years.

## 4 Leasing, factoring and consumer credit companies

According to the sectoral classification of economic entities (ESA 2010), the companies under analysis are included in the S.125 sector – *other financial intermediaries*<sup>1</sup>, as a subcategory referred to as *financial corporations engaged in lending*.

At the beginning of 2019, the list of entities required to report balance sheet data to Národná banka Slovenska was updated in accordance with the relevant NBS Decree<sup>2</sup>. The extension of the sample of reporting entities considerably affected the annual rates of growth in the individual categories of entities.

The total assets of leasing companies as at 31 March 2019 were higher, year on year, by 6.89%. As for consumer credit companies, their total assets were 4.55% lower at the end of March 2019 than a year earlier. The total assets of factoring companies were lower, year on year, by 46.62%.

**Table 9 Total assets of financial corporations engaged in lending (year-on-year percentage changes)**

Total assets	Year-on-year change in %								
	III. 2017	VI. 2017	IX. 2017	XII. 2017	III. 2018	VI. 2018	IX. 2018	XII. 2018	III. 2019
Financial leasing	4.59	3.81	6.88	7.42	9.54	8.30	9.39	9.99	6.89
Factoring	106.58	172.65	225.71	251.11	-7.64	-16.62	-13.88	-19.82	-46.62
Consumer Credit	-1.01	-2.80	3.79	9.87	-19.47	-18.37	-17.21	-20.20	-4.55

Source: NBS.

<sup>1</sup> The European System of National Accounts (ESA 2010) defines 'other financial intermediaries, except insurance corporations and pension funds' as financial corporations and quasi-corporations engaged mainly in financial intermediation through the acceptance of liabilities in forms other than cash, deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, or insurance technical reserves.

<sup>2</sup> NBS Decree No 19/2014 on reporting for statistical purposes by factoring companies, consumer credit companies and leasing companies (Notification No 248/2014).

**Chart 88**

**Evolution of total assets by type of business (EUR millions)**

Source: NBS.

**Chart 89**

**Total assets of financial corporations engaged in lending broken down by type of company as at 31 March 2019**

Source: NBS.

Among companies engaged in non-bank lending, leasing companies have long held the leading position in this market. They accounted for 75% of the total assets in the first quarter of 2019. They were followed by consumer credit companies (23%) and factoring companies (2%).

The geographical breakdown of credits and loans provided by domestic companies engaged in non-bank lending shows that such credits and loans are used predominantly by domestic customers.

In financial leasing, the share of domestic customers was 100%, of which non-financial corporations accounted for 85.78%, households for 13.13%, and other sectors for 1.08%.

Domestic customers constituted 33.42% of consumer credit companies' total customers at 31 March 2019, while customers from the rest of the world accounted for 66.58%. Since the purchase of goods through instalment credit is traditionally an important form of household financing in Slovakia, the household sector continued to account for the largest share of domestic customers, 88.20%, in the quarter under review; it was followed by the non-financial corporations sector with a share of 11.80%.

At the end of the quarter under review, domestic customers constituted 100% of factoring companies' total customers, of which households accounted for 75.35% and non-financial corporations for 24.65%.

**Chart 90**

**Geographical and sectoral breakdown of lending by financial leasing companies as at 31 March 2019**

**Note:** SK = domestic borrowers; EMU = borrowers from other euro area member states; RoW = borrowers from the rest of the world.

Regarding the flow of funds across the individual economic sectors, an interesting aspect is the allocation of financial resources to the types of companies under review, for the provision of credits and loans through non-bank lending channels.

The main source of financing was foreign (borrowed) capital representing 86.52% of the total financial resources. Foreign capital was obtained mostly in the form of bank loans, which accounted for 65.11% at 31 March 2019. The rest was obtained in the form of proceeds from issues of debt securities (24.75%) and credits or loans borrowed from companies belonging to the same group (10.14%).

The main components of own funds were share capital, retained earnings from previous periods, shares and other equity participations.

**Chart 93**

**Breakdown of source capital as at 31 March 2019**

**Source:** NBS.

# 5 Securities

## 5.1 Debt securities

In terms of issuer sector, the stock of debt securities issued in Slovakia broke down as follows at 31 March 2019: government bonds (€38,413 million); bonds issued by monetary financial institutions (€6,024.6 million); debt securities issued by non-financial corporations (€3,769.3 million); and issues of non-monetary financial institutions (€3,519.7 million).

The net issuance of debt securities increased in the first quarter of 2019, by roughly €1.04 billion quarter on quarter, i.e. the amount of newly issued securities was higher than the amount redeemed. This increase was caused mainly by net issues of government bonds in the amount of €527 million and net issues of bank bonds in the amount of €401 million. Non-monetary financial institutions also recorded an increase, specifically €159.3 million, while non-financial corporations recorded a decline in net issues of €44.9 million.

**Table 10 Debt securities (in thousands of EUR)**

Month	Outstanding amounts					Net issues				
	Total	Monetary financial institutions	Non-monetary financial institutions	Nonfinancial corporations	General government	Total	Monetary financial institutions	Non-monetary financial institutions	Nonfinancial corporations	General government
2018 / 03	49,769,741	5,256,133	2,870,935	4,111,291	37,531,382	576,264	-426,118	215,567	295,546	491,269

(EUR millions, %)**

Source: NBS.

**Chart 96**

**Debt securities (outstanding amounts, EUR millions, Q1 2019)**

Source: NBS.

A total of 32 new issues were placed on the securities market in the first quarter of 2019, including 12 issued by non-financial corporations, 5 issued by banks, 7 issued by other financial intermediaries, 6 issued by captive financial institutions and 2 by securities dealers.

The net issuance of short-term debt securities declined by approximately €37.7 million in the first quarter of 2019, mainly as a result of a fall of about €39 million in the banking sector.

The net issuance of long-term debt securities increased in the period under review by roughly €1.1 billion. This increase took place mostly in government bonds (527 million) and bank bonds (€440 million). Marked increases were also recorded in debt securities issued by other financial intermediaries (€80 million) and by captive financial institutions (€65 million). By contrast, the net issuance of long-term debt securities issued by non-financial corporations declined by €45.3 million.

**Chart 97**

**Debt securities (net issues, EUR millions, Q1 2019)**

**Source:** NBS.

According to classification by sector, the largest share of the outstanding issue amount was accounted for by the general government sector (74.3%), while monetary financial institutions had a share of 11.6%, non-financial corporations a share of 7.3%, and non-monetary financial institutions a share of 6.8% at 31 March 2019. In terms of their coupon type, 91.77% of the securities were fixed-coupon securities, 4.56% were zero-coupon securities, and 3.67% were variable-coupon securities. As much as 95% of the issues were denominated in euro, and the rest, 5%, in foreign currencies.

As for maturity, only a minor part (1.7%) of the issues had an original maturity of up to one year, while more than 11% of them had a residual maturity of up to one year.

**Chart 98**

Note: The individual items are classified according to the outstanding amounts of issues as at 31 March 2019.

The following charts illustrate the outstanding amounts of issues in the three key sectors (the government sector, the banking sector, and the non-financial corporations sector) as a function of the issue amount and maturity.

The most numerous debt securities placed on the domestic market by non-financial corporations are those with an outstanding amount of up to €10 million and maturity until 2022. The largest outstanding issue amount is more than €1.1 billion and the longest maturity period exceeds 22 years.

#### Chart 102

**Debt securities: outstanding amounts of domestic issues in S.11 sector (EUR millions)**

Source: NBS.

The largest concentration of outstanding amounts of debt securities issued by banks is up to €50 million and with maturity period until 2022. The largest outstanding amount fluctuates around €250 million and the longest maturity period is until 2050.

**Chart 103**

**Debt securities: outstanding amounts of issues in S.122 Sector (EUR millions)**

Source: NBS.

The number of debt securities issued in the government sector is lower than the number of securities issued in the aforementioned two sectors, but the outstanding amount is much higher in the former case. The issue with the highest outstanding amount is worth €3.0 billion. The most recent issue will mature in 2068.

**Chart 104**

**Debt securities: outstanding amounts of issues in S.13 Sector (EUR millions)**

Source: NBS.

The maturity profile illustrates the course of government debt repayment based on the assumption that no new government bonds will be issued and all the existing issues will be repaid in due time.

**Chart 105**

**Government bonds: maturity profile (EUR millions)**

**Source:** NBS.

The following chart illustrates the outstanding amounts of coupon-paying government bonds as a function of their market price and coupon yield as at the end of the first quarter of 2019. The average market price<sup>3</sup> of these government bonds stood at 116.32% and the coupon yield was 3.06% at that time.

<sup>3</sup> Arithmetical average weighted by the outstanding amount of issues.

**Chart 106**

**Government bonds: outstanding amounts (coupon bonds only)**

**Source:** NBS, CSDB, issue prospectus.

**Note:** The bubble in this chart is directly proportional in size to the outstanding amounts of the individual issues, while the centre of the bubble is given by the intersection of the market price (Source: ECB Centralised Securities Database) and the coupon yield (Source: Issue conditions).

## 5.2 Listed shares

At 31 March 2019, the stock of listed shares issued in Slovakia was higher, quarter on quarter, by €229.6 million. This was caused by increases in the stocks of such shares issued by credit institutions (€39.5 million) and by NFCs (€190.1 million). The stock of listed shares issued in the insurance sector remained unchanged quarter on quarter. The total market capitalisation amounted to €5,029.1 million at 31 March 2019.

**Table 11 Quoted shares (in thousands of EUR)**

Outstanding amounts				
Month	Total	Credit institutions (S.122)	Insurance corporations (S.128)	Non-financial corporations (S.11)
2018 / 03	4,587,424	2,666,432	225	1,920,767
2018 / 06	4,541,083	2,641,073	225	1,899,785
2018 / 09	4,718,946	2,688,061	225	2,030,660
2018 / 12	4,799,489	2,713,512	225	2,085,752
2019 / 03	5,029,079	2,753,021	225	2,275,833

**Source:** NBS.

**Chart 107**

**Quoted shares: market capitalization by sector (EUR millions)**

Source: NBS

The stock of listed shares increased in the quarter under review by 4.8% quarter on quarter. The figure for credit institutions' shares was higher by 1.5%, and that for NFC shares by 9.1%.

The first quarter of 2019 saw a decrease in the stock of listed shares in January (0.5%), followed by an increase in both February (1.6%) and March (3.7%).

## 6 Selected macroeconomic indicators

### 6.1 Long-term interest rate

With effect from 1 July 2013, the approach based on a 'basket of bonds' has been replaced with a 'benchmark-oriented approach'<sup>4</sup>, using the government bond SK4120009044 as a benchmark. Since then the benchmark has been replaced by government bond SK4120008871 (with effect from 1 May 2014), by government bond SK4120007543 (with effect from 1 June 2015), by government bond SK4120010430 (with effect from 1 June 2016) and by government bond SK4120009762 (with effect from 1 June 2018). This approach was also applied during the first quarter of 2019. During that period, the interest rate decreased by 0.35 percentage point, from 0.91% at 31 December 2018 to 0.56% at 31 March 2019.

Chart 111

Benchmark – yield to maturity (p.a.)

### 6.2 Key ECB interest rates

The European Central Bank's interest rate on main refinancing operations, and its interest rates on the marginal lending facility and the deposit facility, remained unchanged at 31 March 2019 from their levels at the end of

<sup>4</sup> See the Methodological Notes, section 7.6. *Long-term interest rate*.

the previous quarter, at 0.00%<sup>5</sup>, 0.25% and -0.40% respectively. The interest rate on two-year government bond has the value of -0,32% at the end of the first quarter 2019. The five-year government bond yield was 0.09% and the ten-year government bond yield decreased from 0.94% to 0.68% as at the end of Q1 2019.

<sup>5</sup> The main refinancing rate has been at this level since 16 March 2016.

# 7 Methodological notes

## 7.1 Balance-sheet statistics of monetary financial institutions

**Credit institutions in Slovakia:** banks and branches of foreign banks operating in Slovakia, (except Národná banka Slovenska).

**Household sector** – this sector includes:

**a/ Households (S.14):** a sub-sector comprising households (sole proprietors) and the population (citizens). Households (sole proprietors) are private entrepreneurs not registered in the Commercial Register, doing business under the Trade Licensing Act, and natural persons doing business under a law other than the Trade Licensing Act and not registered in the Commercial Register, and private farmers not registered in the Commercial Register. The population includes households in their capacity as final consumers (citizens' accounts).

**b/ Non-profit institutions serving households (S.15):** a sub-sector comprising civic interest associations (unions, societies, movements, trade unions, etc.) and their organisational units, political parties and movements, their organisational units, church and religious societies, and institutions ensuring the proper conduct of certain professions (professional organisations). This sub-sector also includes the following institutions: funds; apartment owners' associations; land, forest and pasture associations; organisations providing publicly beneficial services; humanitarian societies; social, cultural, recreational and sports associations and clubs; charities; church and private schools; private preschool facilities; non-public special-purpose funds (e.g. the anti-drug fund); interest associations of legal entities.

**Monetary financial institutions (MFI):** financial institutions which together form the money-issuing/creating sector of the euro area. These include resident central banks, credit institutions and other resident financial institutions whose business is to receive deposits and/or other redeemable instruments from entities other than MFIs and, for their own account (at least in economic terms), to grant credit and/or invest in securities. The latter group consists predominantly of money market funds, i.e. funds investing in short-term and low-risk instruments, which usually have a maturity of up to and including one year.

**Non-financial corporations (S.11):** business entities that are registered in the Commercial Register, i.e. domestic or foreign corporate entities, do-

mestic natural persons registered in the Commercial Register and engaged in profit-oriented activities in any area of business, except in financial intermediation and insurance. The non-financial sector also includes subsidised organisations, public institutions and non-profit institutions whose expenses are covered with sales by 50 percent or more.

**Non-performing loans:** defaulted loans that are subject to the provisions of Section 73 of NBS Decree No. 4/2007 of 13 March 2007 (as amended) on banks' own funds and own funds requirements and on investment firms' own funds and own funds requirements.

A specific borrower is considered to be in default if

a) the bank assesses that the borrower will probably fail to meet its commitments to the bank, its subsidiary or parent company, without the security being realised;

or

b) the borrower is more than 90 days in arrears with a significant commitment to the bank, its subsidiary or parent company.

**Principle of residency:** the principle that a counterparty's country of residence is the country in which the counterparty has a centre of economic interest. This means that an economic agent is considered to be resident in the country where the agent operates for one or more years, or intends to operate on a permanent basis, or where the agent has already been registered.

**Remaining assets:** a residual item on the asset side of the balance sheet. In addition to fixed assets and financial derivatives with a positive fair value, this item includes, for example, accrued revenues, including accrued interest received; profit share to be received; prepaid expenses; prepaid insurance premiums; outstanding insurance claims; claims of credit institutions not related to their main business; other cash items and cash in transit, transit items, suspense items, collection claims, advance payments and other asset items not elsewhere classified.

**Remaining liabilities:** a residual item on the liability side of the balance sheet. This item includes, for example, financial derivatives with a negative fair value; accrued expenses, including accrued interest payable on deposits and loans received, and on securities; profit share to be paid; deferred revenues; liabilities of credit institutions not related to their main business; provisions representing liabilities towards third parties; transit items; suspense items; funds waiting for settlement; subsidies; net equity of households in pension fund reserves, liabilities arising from collection, prepayments received and other liability items not elsewhere classified.

## 7.2 Interest rate statistics of monetary financial institutions

Harmonised MFI interest rate statistics are compiled from data obtained from credit institutions on deposits received from, and loans provided to, non-financial corporations and households, which are both Slovak and euro area residents. The term *households* refers to the population, including households, sole proprietors and non-profit institutions serving households. The term *new loans* or *new deposits* covers all new deposits received or loans granted during the respective reference month.

The term *outstanding amount* of loans or deposits means balances at the end of the respective reference period. Interest rates applied by credit institutions on loans or deposits are calculated as weighted arithmetic averages of the rates agreed on an annual basis.

In the case of loans provided to households *for house purchase* and *loans for consumption*, the *annual percentage rate of charge* is also reported to express the borrower's total credit-related costs. The borrower's total costs comprise the element of interest rate and the element of other credit-related costs. The collection of the annual percentage rates of charge for statistical purposes allows developments in credit-related charges to be monitored over time.

*Secured loans* represent a new category, which is required for the compilation of interest rate statistics as from 2010. These are the loans secured by any type of collateral or a personal guarantee, the value of which is higher than, or equal to, the new loan's total volume. A partially secured loan is to be classified as unsecured.

The category of *loans of up to €1 million* for non-financial corporations is designed specifically for small and medium-sized enterprises. The *loans of over €1 million* category is intended for large corporations. Interest rates reflect the borrower's economic power to negotiate appropriate credit terms and conditions. Interest rate developments indicate that loans of *up to €1 million* are provided at higher rates than loans of *over €1 million*.

**Agreed average annual interest rate:** average interest rate individually agreed between a bank and its customer for a loan, expressed in annualised terms (percentage per annum). An agreed average annual rate is to be determined on the basis of all interest rates on loans.

An agreed interest rate is converted into an average annual interest rate according to the formula:

$$x = \left( 1 + \frac{r_{ag}}{n} \right)^n - 1,$$

where

$x$  is the agreed average annual interest rate;

$r_{ag}$  is the annual interest rate agreed between the bank and its customer (borrower). The dates of loan interest capitalisation are set for the year at regular intervals;

$n$  is the number of periods of loan interest capitalisation per year, i.e. 1 for annual payments; 2 for semi-annual payments, 4 for quarterly payments, and 12 for monthly payments.

**Interest rate statistics (outstanding amounts):** these cover the outstanding amounts of bank loans of all types provided to customers and not yet repaid, and the outstanding amounts of all deposits received from customers and not yet redeemed, in all periods up to the date of reporting (reference period). The average interest rates agreed are expressed in annualised terms (p.a.). The method of calculation depends on the periodicity of capitalisation. The criterion for outstanding amount classification is the maturity of loans or the term of deposits.

**Interest rate statistics (new business):** these cover all the new loan and deposit agreements made between banks and their customers in the period under review (month). This applies to any agreement in which an interest rate is set for the first time, as well as to existing agreements that are renegotiated with the customers and in which the original terms and conditions are changed with an impact on interest levels (e.g. the new agreement is not prolonged automatically, variable interest rates are not changed, etc.). Interest rate statistics on new transactions cover the actual rates of interest agreed in individually negotiated agreements in the reference month. The method for calculating the average interest rates agreed, in annualised terms, depends on the periodicity of capitalisation.

**Initial rate fixation:** the period of time, set in advance, during which the interest rate on a loan is fixed. In interest rate statistics for new loans (new business), **only** the rate agreed for an initial fixation period prior to the loan agreement is reported. Loans **without** interest rate fixation are included in the category of 'variable rates and initial rate fixation for up to one year'.

## 7.3 Statistics of mutual funds

Under the act on collective investment No. 203/2011 Coll., mutual funds are divided into open-end funds, closed-end funds, and specialised funds. Open-end mutual funds can be categorised according to the type of instrument in which they primarily invest. According to the area of investment, mutual funds are divided into money market funds, equity funds, bond funds, mixed funds, real estate funds, and other funds. The investment strategy of a fund is directly related to the expected rate of return, as well as to the risk involved. The general rule is that the higher the potential return, the higher the risk involved. Limits for investment in the individual types of instruments are defined in the Collective Investment Act.

According to the sectoral classification of economic entities, money market funds are treated as *monetary financial institutions* (having specific sector – S.123) and other categories of mutual funds, referred to as investment funds (sector S.124).

The statistics of mutual funds assets and liabilities are defined by the relevant regulations and guidelines of the European Central Bank<sup>6</sup>.

Money market funds (MMFs) are collective investment undertakings complying with the following criteria:

- a) they pursue the investment objective of maintaining a fund's principal and providing a return in line with the interest rates of money market instruments;
- b) they invest in money market instruments which comply with the criteria for money market instruments set out in Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations, and administrative provisions relating to undertakings for collective investment in transferable securities, or deposits with credit institutions or, alternatively, ensure that the liquidity and valuation of the portfolio in which they invest is assessed on an equivalent basis;
- c) they ensure that the money market instruments they invest in are of high quality, as determined by the management company. The quality

<sup>6</sup> Regulation (EU) no 1073/2013 of the ECB of 18 October 2013 concerning statistics on the assets and liabilities of investment funds (recast) (ECB/2013/38), OJ L 297, 7.11.2013, p. 73 ([http://www.ecb.europa.eu/ecb/legal/pdf/en\\_02013r1073-20131127-en.pdf](http://www.ecb.europa.eu/ecb/legal/pdf/en_02013r1073-20131127-en.pdf)).

Regulation (EU) No 1071/2013 of the ECB of 24 September 2013 concerning the balance sheet of the monetary financial institutions sector (recast) (ECB/2013/33), OJ L 297, 7.11.2013, p. 1 (<http://www.ecb.europa.eu/ecb/legal/pdf/02013r1071-20131127-en.pdf>).

Guideline of the ECB of 4 April 2014 on monetary and financial statistics recast) (ECB/2014/15), OJ L 340, 26.11.2014, p. 1 ([http://www.ecb.europa.eu/ecb/legal/pdf/oj\\_jol\\_2014\\_340\\_r\\_0001\\_en\\_txt.pdf](http://www.ecb.europa.eu/ecb/legal/pdf/oj_jol_2014_340_r_0001_en_txt.pdf)).

of a money market instrument shall be considered, inter alia, on the basis of these factors:

- the credit quality of the money market instrument;
  - the nature of the asset class represented by the money market instrument;
  - for structured financial instruments, the operational and counterparty risk inherent within the structured financial transaction;
  - the liquidity profile;
- d) they ensure that their portfolio has a weighted average maturity of no more than six months and a weighted average life of no more than twelve months;
- e) they provide daily net asset value and a price calculation of their shares/units, and daily subscription and redemption of shares/units;
- f) they limit investment in securities to those with a residual maturity until the legal redemption date of less than or equal to two years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days, whereby floating rate securities should be reset to a money market rate or index;
- g) they limit investment in other collective investment undertakings to those complying with the definition of MMFs;
- h) they do not take direct or indirect exposure to equity or commodities, including via derivatives, and only use derivatives in line with the money market investment strategy of the fund. Derivatives which give exposure to foreign exchange may only be used for hedging purposes. Investment in non-base currency securities is allowed provided the currency exposure is fully hedged;
- i) they have either a constant or fluctuating net asset value.

The following terms are used in the definition of a money market fund:

**Close substitutability for deposits in terms of liquidity:** the ability of shares/units of collective investment undertakings, under normal market circumstance, to be repurchased, redeemed or transferred, at the request of the holder, where the liquidity of the shares/units is comparable to the liquidity of deposits.

**Money market instruments:** instruments of a high credit quality, if they have been awarded one of the two highest available short-term credit ratings by each recognised credit rating agency that has rated the instruments or, if the instruments are not rated, they are of an equivalent quality as determined by the management company's internal rating process. Where a recognised credit rating agency divides its highest short-term rating into two categories, these two ratings shall be considered as a single category and therefore the highest rating available.

When the weighted average lifetime and the weighted average maturity are calculated, the impact of financial derivative instruments, deposits and efficient portfolio management techniques are to be taken into account.

**Undertakings for collective investment:** undertakings the sole object of which is the collective investment in transferable securities of capital raised from the public and the shares/units of which are, at the request of holders, redeemed directly or indirectly, out of those undertakings' assets. Such undertakings may be constituted under the law of contract (as *common funds* managed by an asset management company), or under the trust law (as *unit trusts*), or under the commercial law (as *investment companies*).

**Weighted average life:** the weighted average of the remaining maturity of each security held in a fund, meaning the time until the principal is repaid in full, disregarding interest and not discounting. Contrary to the calculation of the weighted average maturity, the calculation of the weighted average life for floating rate securities and structured financial instruments does not permit the use of interest rate reset dates and instead only uses a security's stated final maturity. The weighted average life is used to measure the credit risk: the longer the reimbursement of principal is postponed, the higher the credit risk. The weighted average life is also used to limit the liquidity risk.

**Weighted average maturity:** a measure of the average length of time to maturity of all of the underlying securities in the fund weighted to reflect the relative holdings in each instrument, assuming that the maturity of a floating rate instrument is the time remaining until the next interest rate reset to a money market rate, rather than the time remaining before the principal value of the security must be repaid. In practice, weighted average maturity is used to measure the sensitivity of a MMF to changing money market interest rates.

## 7.4 Statistics of other financial intermediaries

According to the sectoral classification of economic entities (ESA 2010), the companies under analysis are included in the S.125 sector – *other financial intermediaries*<sup>7</sup>, as a subcategory referred to as *financial corporations en-*

---

<sup>7</sup> The European System of National Accounts (ESA 2010) defines 'other financial intermediaries, except insurance corporations and pension funds' as financial corporations and quasi-corporations engaged mainly in financial intermediation through the acceptance of liabilities in forms other than cash, deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, or insurance technical reserves.

gaged in lending through the acceptance of liabilities in forms other than cash, deposits, and/or close substitutes for deposits from institutional units other than monetary financial institutions, or insurance technical reserves.

The S.125 sector comprises the following types of companies:

1. **Financial companies engaged in lending** – companies granting credits and loans to non-financial corporations and households. They include financial leasing companies, factoring companies, and consumer credit companies.
2. **Securities and derivatives dealers** – private individuals or firms specialising in securities market transactions; 1) they provide assistance to companies issuing new securities, provide guarantee for new securities and their placement on the market; 2) they trade in existing or new securities **for their own account**.
3. **Financial vehicle corporations** – financial companies created to be holders of securitised assets or liabilities that have been removed from the balance sheets of corporations within the scope of their restructuring.

Other financial intermediaries are engaged primarily in long-term financing, which distinguishes the S.125 sector from that of S.122+S.123 (monetary financial institutions).

Data on OFIs need to be collected for the purpose of monitoring their activities in financial intermediation outside the *monetary financial institutions* sector (MFIs – banks, branches of foreign banks, and money market funds). The activities performed by OFIs are similar to those pursued by MFIs. The two types of institutions complement each other. Since the balance sheets of MFIs reported to the European Central Bank for statistical purposes contain no data on OFIs (though OFIs are owned fully or partly by MFIs), statistical data on OFIs need to be collected for the sake of a more detailed statistical overview.

The NBS Statistics Department has been monitoring these institutions since 2007, when their obligation to report data to NBS was imposed by an NBS decree<sup>8</sup>. The range of data reported complies in full with the current requirements<sup>9</sup> of the European Central Bank regarding the statistics of other financial intermediaries.

---

<sup>8</sup> Decree of Národná banka Slovenska No. 19/2014 on reporting by factoring, leasing and consumer credit companies for statistical purposes.

<sup>9</sup> Guideline of the ECB of 4 April 2014 on monetary and financial statistics recast (ECB/2014/15), OJ L 340, 26.11.2014, p. 1 (ANNEX III, PART 11) ([http://www.ecb.europa.eu/ecb/legal/pdf/oj\\_jol\\_2014\\_340\\_r\\_0001\\_en\\_txt.pdf](http://www.ecb.europa.eu/ecb/legal/pdf/oj_jol_2014_340_r_0001_en_txt.pdf)).

In order to minimise the costs related to the reporting of data to NBS, the so-called stratified cut-off tail sampling technique is applied, with data collected only from entities forming a representative sample within the given group, i.e. from entities representing at least 95% of the group's total assets. In 2017, quarterly balance-sheet data are collected from eighteen (out of 73) companies providing financial leasing services as the main or substantial part of their business activity, from 16 (out of 157) consumer credit companies, and from seven (out of 17) factoring companies. The missing data are supplemented with estimated figures, in order that the given types of entities are covered up to 100%.

## 7.5 Securities statistics

### 7.5.1 Securities issuance statistics

The compilation of securities issues statistics is governed by the relevant guideline of the European Central Bank<sup>10</sup>. These statistics provide information on all debt securities and quoted shares issued by domestic entities in any currency and in any country.

The individual issues are classified according to the sector of issuer. Further classification is made according to currency (issues in euro or other currency), type of security (debt or quoted securities), and according to the original maturity (short-term up to one year or long-term over one year). Debt securities are further divided according to the type of coupon yield (fixed, variable, or zero coupon).

Debt securities statistics focus on the outstanding amounts of issues (stocks) and flows, which are broken down into gross issues and redemptions. The difference between them represents issues in net terms.

#### a) Gross issues

Gross issues during the reporting period must include all issues of debt securities and quoted shares where the issuer sells newly created securities for cash. They concern the regular creation of new instruments. The point in time at which issues have been concluded is defined as the time at which payment is made; the recording of issues must therefore reflect as closely as possible the timing of payment of the underlying issue.

---

<sup>10</sup> Guideline of the ECB of 4 April 2014 on monetary and financial statistics recast (ECB/2014/15), OJ L 340, 26.11.2014, p. 1 (ANNEX III, PART 12) ([http://www.ecb.europa.eu/ecb/legal/pdf/oj\\_jol\\_2014\\_340\\_r\\_0001\\_en\\_txt.pdf](http://www.ecb.europa.eu/ecb/legal/pdf/oj_jol_2014_340_r_0001_en_txt.pdf)).

## b) Redemptions

Redemptions during the reporting period cover all repurchases of debt securities and quoted shares by the issuer, where the investor receives cash for the securities. Redemptions concern the regular deletion of instruments. They cover all debt securities reaching their maturity date, as well as early redemptions. Company share buy-backs are covered, if the company repurchases all shares against cash prior to a change of its legal form, or part of its shares against cash which are cancelled, leading to a reduction in capital.

## c) Net issues

Net issues represent the balance of all issues made, minus all redemptions that have occurred during the reporting period.

Outstanding amounts in the reporting period should be equal to the outstanding amounts recorded in the previous period, increased by gross issues made in the reporting period and reduced by issues redeemed in the same period. In the same way, the outstanding amounts in the reporting period can be expressed as the outstanding amounts recorded in the previous period, plus net issues in the reporting period (see the Scheme 1 below).

In fact, differences may occur as a result of price and exchange rate changes, reclassification, revision, or other adjustments.

## 7.5.2 Debt securities

For debtors, debt securities represent an alternative to bank loans; for creditors, they represent a possible substitute for bank deposits and marketable instruments issued by banks.

Securities issues statistics cover the following instruments:

### i) **Short-term debt securities**

- Treasury bills and other short-term paper issued by the general government;

**Scheme 1**

a)	outstanding issues at the end of the reporting period	≈	outstanding issues at the end of the previous reporting period	+	Gross issues during the reporting period	-	Redemptions during the reporting period
b)	outstanding issues at the end of the reporting period	≈	outstanding issues at the end of the previous reporting period	+	Net issues during the reporting period		

- negotiable short-term securities issued by financial and non-financial corporations; a variety of terms are used for such paper including, for example commercial papers, commercial bills, promissory notes, bills of trade, bills of exchange and certificates of deposit;
- short-term securities issued under long-term underwritten note issuance facilities;
- bankers' acceptances.

## ii) Long-term debt securities

- bearer bonds;
- subordinated bonds;
- bonds with optional maturity dates, the latest of which is more than one year away;
- undated or perpetual bonds;
- variable rate notes;
- convertible bonds;
- covered bonds;
- index-linked securities where the value of the principal is linked to a price index, the price of a commodity or to an exchange rate index;
- deep-discounted bonds;
- zero coupon bonds;
- euro bonds;
- global bonds;
- privately issued bonds;
- securities resulting from the conversion of loans;
- loans that have become negotiable de facto;
- special types of bonds (debentures) and borrowed securities (loan stock) convertible into shares, whether the shares of the issuing corporation or shares of another company, as long as they have not been converted. Where separable from the underlying bond, the conversion option, considered to be a financial derivative, is excluded;
- shares or stocks that pay a fixed income but do not provide for participation in the distribution of the residual value of the corporation on dissolution, including non-participating preference shares;
- financial assets issued as part of the securitisation of loans, mortgages, credit card debt, accounts receivable, and other assets.

The following instruments are excluded:

- transactions in securities as part of repurchase agreements;
- issues of non-negotiable securities;
- non-negotiable loans.

### 7.5.3 Quoted shares

Quoted shares are defined in this case as shares that have been admitted to trading on a quoted market, i.e. the main or parallel market, as well as shares admitted to trading on a regulated free market, but only if they have a fair market value. Their values are reported as market capitalisation for the individual sectors.

Quoted shares include:

- capital shares issued by limited liability companies;
- redeemed shares in limited liability companies;
- dividend shares issued by limited liability companies;
- preferred or preference stocks or shares which provide for participation in the distribution of the residual value on dissolution of a corporation; these may be quoted or unquoted on a recognised stock exchange;
- private placements where possible.

If a company is privatised and the government keeps part of the shares and the other part is quoted on a regulated market, the whole value of the company's capital is recorded within the outstanding amount of quoted shares, since all shares could potentially be traded at any time at market value. The same applies if part of the shares is sold to large investors and only the remaining part, i.e. free float, is traded on the stock exchange.

Quoted shares exclude:

- shares offered for sale but not taken up on issue;
- debentures and loan stock convertible into shares; these are included once they are converted into shares;
- the equity of partners with unlimited liability in incorporated partnerships;
- government investments in the capital of international organisations which are legally constituted as corporations with share capital;
- issues of bonus shares at the time of issue only and split share issues; bonus shares and split shares are, however, included indistinguishably in the total stock of quoted shares.

## 7.6 Long-term interest rates

**Long-term interest rate stability is one of the convergence criteria laid down in the Maastricht Treaty.** This criterion expresses the requirement for sustainable convergence, which is to be achieved by each Member State. The average nominal long-term interest rate in a Member State must not exceed, by more than 2%, the average nominal long-term interest rate in the three Member States with the lowest inflation rates in the year fol-

lowing the last assessment. The interest rates are measured on the basis of *long-term government bond rates* or the rates for comparable securities.

The statistical principles of long-term interest rate reporting are defined in the following key terms.

The term *bond issuer* refers to the *central government*. The *maturity of government bonds* is a residual maturity period of around ten years. The residual maturity period is recommended to be between 9.5 and 10.5 years. The type of bonds used should be sufficiently *liquid*. This requirement affects the choice between a *benchmark-oriented approach* and an *approach based on a basket of bonds*, depending on the national conditions. The benchmark-oriented approach treats bonds as a key indicator of the market conditions. The bond issue with the highest liquidity and turnover is often the most recent issue of sizeable volume. The approach based on a basket of bonds offers a choice of bonds from various types of bonds with various ISIN codes. The bonds available have the same weight.

In view of the situation in the local market for securities, the *benchmark-oriented approach* had been used until the end of January 2012. From the entry of Slovakia into the euro area to January 2012, daily yields to maturity were reported to the ECB for the following government bond issues:

SK4120004318    Benchmark for the period 01/2009 – 06/2010

SK4120007204    Benchmark for the period 07/2010 – 01/2012.

With effect from 1 February 2012, the benchmark-oriented approach has been replaced with an approach based on a basket of bonds. This basket included two government bond issues that fully complied with the criteria:

SK4120004318 and SK4120007543    Benchmark for the period 02/2012 – 06/2013.

With effect from 1 July 2013, the *approach based on a basket of bonds* has been replaced with a *benchmark-oriented approach*.

SK4120004318    Benchmark for the period 07/2013 – 04/2014,

SK4120008871    Benchmark for the period 05/2014 – 05/2015,

SK4120007543    Benchmark for the period 06/2015 – 05/2016,

SK4120010430    Benchmark for the period 06/2015 – 05/2018,

SK4120009762    Benchmark for the period 06/2018 – to date.

# Abbreviations

APRC	Annual percentage rate of charge
ECB	European Central Bank
ESA95	European System of Accounts
MFI	Monetary financial institutions (banks, branches of foreign banks, money market funds)
MMF	Money market funds
NMFI	Non-monetary financial institutions
p. p.	Percentage point
P	Provisions
S	Securities
SASS	Slovak Association of Asset Management Companies
SDDS	Special Data Dissemination Standard as defined by the International Monetary Fund

# Glossary

**Aggregate balance sheet of Slovakia:** a summary statistical balance sheet of all monetary and financial institutions based in Slovakia, excluding NBS.

**Building loans:** loans provided by home savings banks under Act No. 310/1992 Coll. on home savings as amended.

**Consumer loans:** defined for reporting purposes as loans provided for the purpose of personal consumption, i.e. the purchase of goods and services.

**Investment loans:** loans tied to the cycle of fixed assets, where the individual components of fixed assets are tied for a period longer than one year (except for loans provided for the purchase and/or technical development of land and buildings).

**Intermediate loans:** loans provided by home savings banks under the provisions of Act No. 310/1992 Coll. on home savings as amended.

**Key ECB interest rates:** the interest rates set by the Governing Council of the European Central Bank (ECB), determining the monetary policy stance of the ECB. These interest rates are the rate for the main refinancing operations, the rate for the marginal lending facility, and the rate for the deposit facility.

**Monetary financial institutions (MFI):** national central banks, credit institutions and other financial institutions whose business is to collect deposits and/or other redeemable instruments from entities other than MFIs, to grant credit and loans, and to make investments in securities for their own account (e.g. money market funds).

**Mortgage loans:** loans with a maturity of at least four years (but not more than 30 years), which are secured by a lien on domestic real estate and which satisfy the requirements laid down in Section 68 of Act No. 483/2001 Coll. on banks and on amendments to certain laws as amended.

**Nominal value of loan:** the outstanding amount of the loan principal, excluding accruals and other due amounts.

**Non-performing loan:** any loan where the bank assesses that the borrower is unlikely to meet its commitments without the security being realised, or where the borrower is more than 90 days in arrears with a significant commitment to the bank.

**Operating loans:** loans tied to the cycle of operating (current) assets, where the individual current asset components are usually fixed for a period of up to one year. Such loans are provided, for example, for the purchase of material supplies, raw materials, semi-finished goods, finished products, claims related to trade credits, or for the coverage of seasonal fluctuations in economic activities.

**Original maturity period:** the time aspect of claims and liabilities classification based on the contractual (agreed) maturity period.

**Other real estate loans:** real estate loans other than mortgage loans, building loans, or intermediate loans.

**Pension funds:** funds managed by pension fund management companies or supplementary pension asset management companies.

**Real estate loans:** all loans provided for the purchase and/or technical development of land and buildings, which are registered with the Land Registry under Act No. 162/1995 Coll. on land registries and registration of ownership title and other rights to real estate (the Land Registry Act) as amended.

**Residual maturity period:** for claims and liabilities, the residual maturity period is the difference between the agreed maturity date and the date for which the relevant report/statement is compiled, i.e. usually the end of a month, quarter, or year.

**Secured loans:** for the purpose of interest rate statistics, these are loans secured up to their total amount using the technique of 'funded credit protection', or secured by a guarantee using the technique of 'unfunded credit protection' so that the value of collateral or guarantee is higher or equal to the total amount of the new loan. If the requirements for credit protection are not satisfied, the new loan is considered unsecured.

**Renegotiated loans** are a part of new loans and are covering all changes to former contract with the active participation of the client, resulting in the change in contract conditions with effect on the interest rate. These loans do not bring new contracts to the market.

**Pure new loans** are loans which are a part of new loans and are calculated as the difference between the total amount of new loans and renegotiated loans, the so called new money in economy.

# Sector classification

Classification of institutional sectors and sub-sectors according to the European System of National and Regional Accounts (ESA2010):

- S.1 Residents – Slovakia (residents of the Slovak Republic)**
  - Residents – Other euro area member states** (euro area residents, except SR residents)
    - S.11 Non-financial corporations**
    - S.12 Financial corporations**
      - S.121 Central Bank (Národná banka Slovenska)
      - S.122 Other monetary financial institutions
      - S.123 Money market funds
      - S.124 Investment funds
      - S.125 Other financial intermediaries
      - S.126 Financial auxiliaries
      - S.127 Captive financial corporations and money lenders
      - S.128 Insurance corporations
      - S.129 Pension funds
    - S.13 General government**
      - S.1311 Central government
      - S.1312 Regional government
      - S.1313 Local government
      - S.1314 Social security funds
    - S.14 Households**
      - S.141 Employers
      - S.142 Own-account workers
      - S.143 Employees
      - S.144 Recipients of property incomes, pensions and other transfer incomes
      - S.145 Others
    - S.15 Non-profit institutions serving households**
- S.2 Rest of the world** (all countries, except Slovakia and the euro area)
