* A change in the system and methodology of statistical reporting in January 2023 led to several changes in the data:

1) Instead of former statistical category of "housing loans", the data include the following:

- loans provided under the Act No 90/2015 Coll. on housing loans and amending certain laws, as amended

- building loans (building loans and interim loans) regardless of the legal framework.

The data still include only loans provided to households sector (S.143, S.144).

2) The data as of January 2023 have been reclassified by individual banks. Most of the shift in the volume of loans between December 2022 and January 2023, as well as in the shares of individual banks, is a consequence of this reclassification.

** The data for January 2023, that were formerly published under the old methodology valid until the end of 2022, have been revised according to the new methodology.

*** Data include building loans and interim loans.
